RELEVANT EXPERIENCE

Peer Mentor

RMIT University

July 2026 - Present

- Invited to help mentor students for RMIT courses: Further Programming and Algorithms and Analysis
- Support students as they transition into university and navigate academic and social challenges.
- Provide peer guidance, share relevant university resources and help students feel connected to the RMIT community.

PROJECTS

Gator CLI

GitHub

Jun 2026

- RSS Feed blog aggregator from scratch built using Go.
- Made HTTP requests to provided urls and saved metadata/details in the Postgres Database.
- Used Goose and SQLC to create migrations and Go functions to access the database.

SQL Data Warehouse

GitHub

Feb 2026

- Built a SQL Server data warehouse ingesting **116,300** rows through ETL pipelines.
- Designed Medallion architecture with bronze, silver, gold layers.

NSW Crime RAG Chatbot

GitHub

Oct 2025

- Built with Python and LangChain to index NSW crime reports for question answering with retrieval.
- Used OpenAI's text-embedding-3-small and chunking with overlap.
- Achieved **0.68** Effectiveness, **0.98** Faithfulness, **0.65** Source Attribution, Overall score **0.8**.

House Price Prediction

GitHub

Jul 2025

- Regression pipeline on Melbourne housing data built with Python.
- Built baseline **Linear Regression** and **Random Forest** models.
- Achieved MAE **191,711**, RMSE **305,005**, and R^2 **0.76** scores.

PERSONAL SUMMARY

Final year Computer Science student specialising in Enterprise Systems Development and Data Science with hands on experience in SQL warehouses, ETL pipelines, and retrieval based systems.

SKILLS

Languages

Python	SQL
Java	Go
JavaScript	TypeScript

Data Engineering & Cloud

PySpark	Airflow
Snowflake	AWS
SQL Server	PostgreSQL
ETL/ELT Pipelines	NoSQL

Tools

Docker	Git
GitHub	Tableau
Power BI	Linux

CERTIFICATIONS

Data Engineer

[DataCamp](#)

Power BI for Beginners

[Simplilearn](#)

EDUCATION

Bachelor of Computer Science

RMIT University **Expected Nov 2027**

Minors: Enterprise Systems Development & Data Science
Melbourne, Australia

Relevant Coursework

Further Programming, Advanced Programming in Data Science, Database Applications, Foundations of AI, Big Data Processing, Data Visualisation & Communication, Algorithms and Analysis, Full Stack Development
